

MAGICA

Scraping radius concrete mixing plant with loading via skip,
designed to work like a truck mixer feeding plant

Characteristics

MAGICA

This plant provides loading via skip and is designed to work like a truck mixer feeding plant.

MAGICA MINI

It is the smallest version of the MAGICA plant, it is normally used by our customers together with a small block making machine.

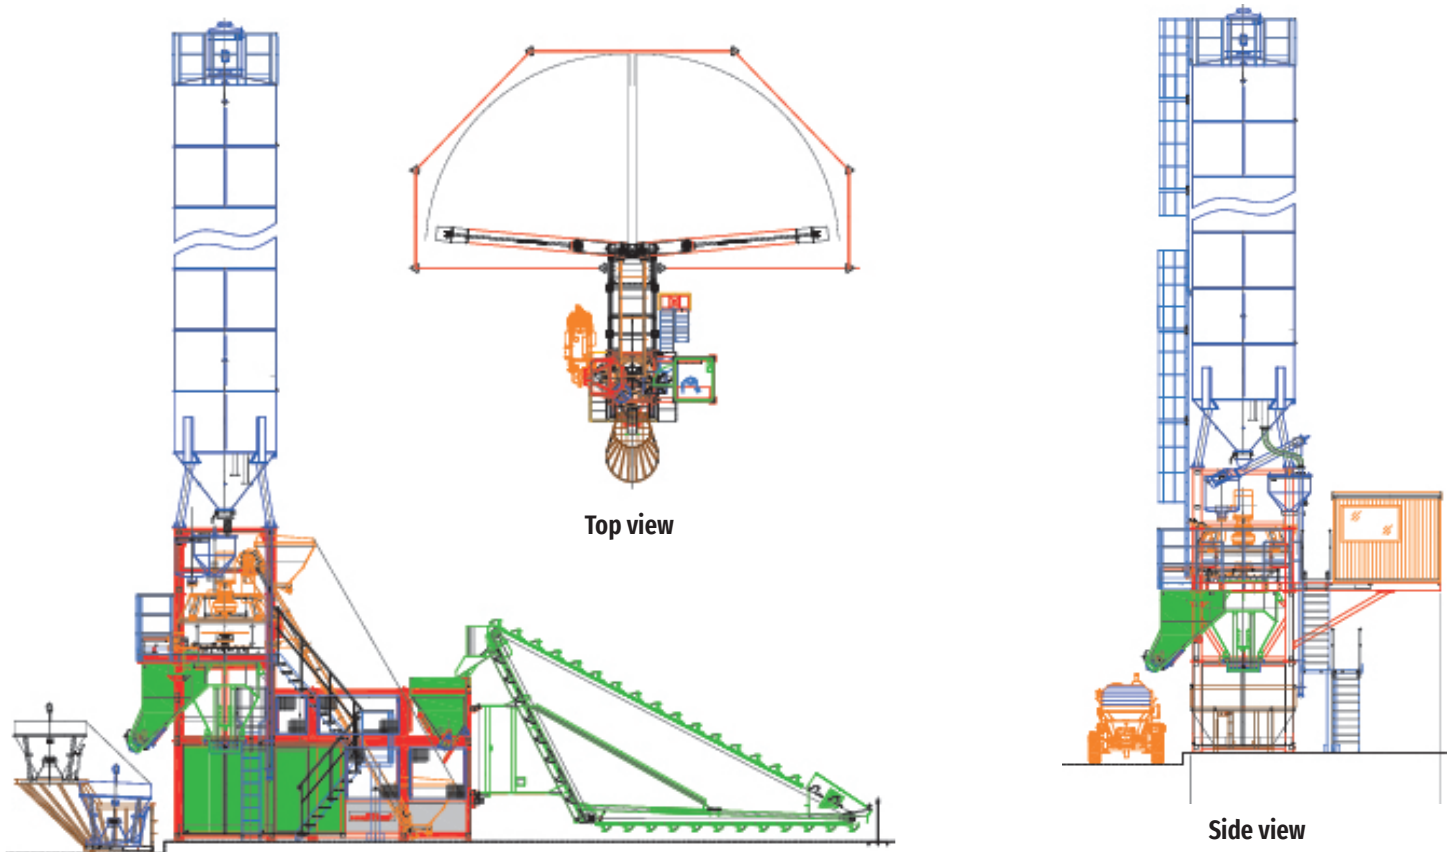

SCRAPING RADIUS

The plants are equipped with a scraping radius and it is also possible to have a second one to use up to 4 aggregates.

Key points

- ✓ **Planetary mixers:** Excellent quality of concrete at the price of a small concrete mixing plant (MAGICA MINI).
- ✓ **Load cells:** The aggregates are correctly dosed in the waiting hopper thanks to the 3 load cells.
- ✓ **Adaptability:** Plant can discharge concrete at 2500 mm to feed block machine directly or 4.000 mm to feed truck mixers.

Configurations

MAGICA – MINI MAGICA		MM 400	MM 500	M 900	M 1200	M 1800	M 2200
Fresh concrete	lt	300	450	600	900	1200	1880
Cement weigher	kg	150	250	300	450	600	900
